**STUDMASTERS COMMENTS:**

*An absolutely massive ram for his age, weighing 130kg at 15 months and 160 kg at 20 months old. But unlike many other big, fast maturing rams, Trojan has a very appealing stiff-locked white, waxy wool showing perfect alignment and crimp definition. As his outstanding figures prove, there is not a trace of suint or cross-fibre. His face and eyes are perfectly pure, very soft and masculine. I believe Trojan will breed absolutely exceptional progeny using almost any stud ewe. He is the safest ram I have seen for many years.*

## *Keeping it in the family*

*Our star performer OC Trojan 1450 has some outstanding progeny from a very elite, heavy cutting ewe "Tara". This was exactly the joining we wanted and the results are exactly what we expected.*

*151305 (left) and 151303 (right), both with great heavy cutting wool- growing skins, oozing quality crimp, white waxy nourishment with density. They are also well structured and at 5 ½ months old, showing rapid growth rate and very big heads.*

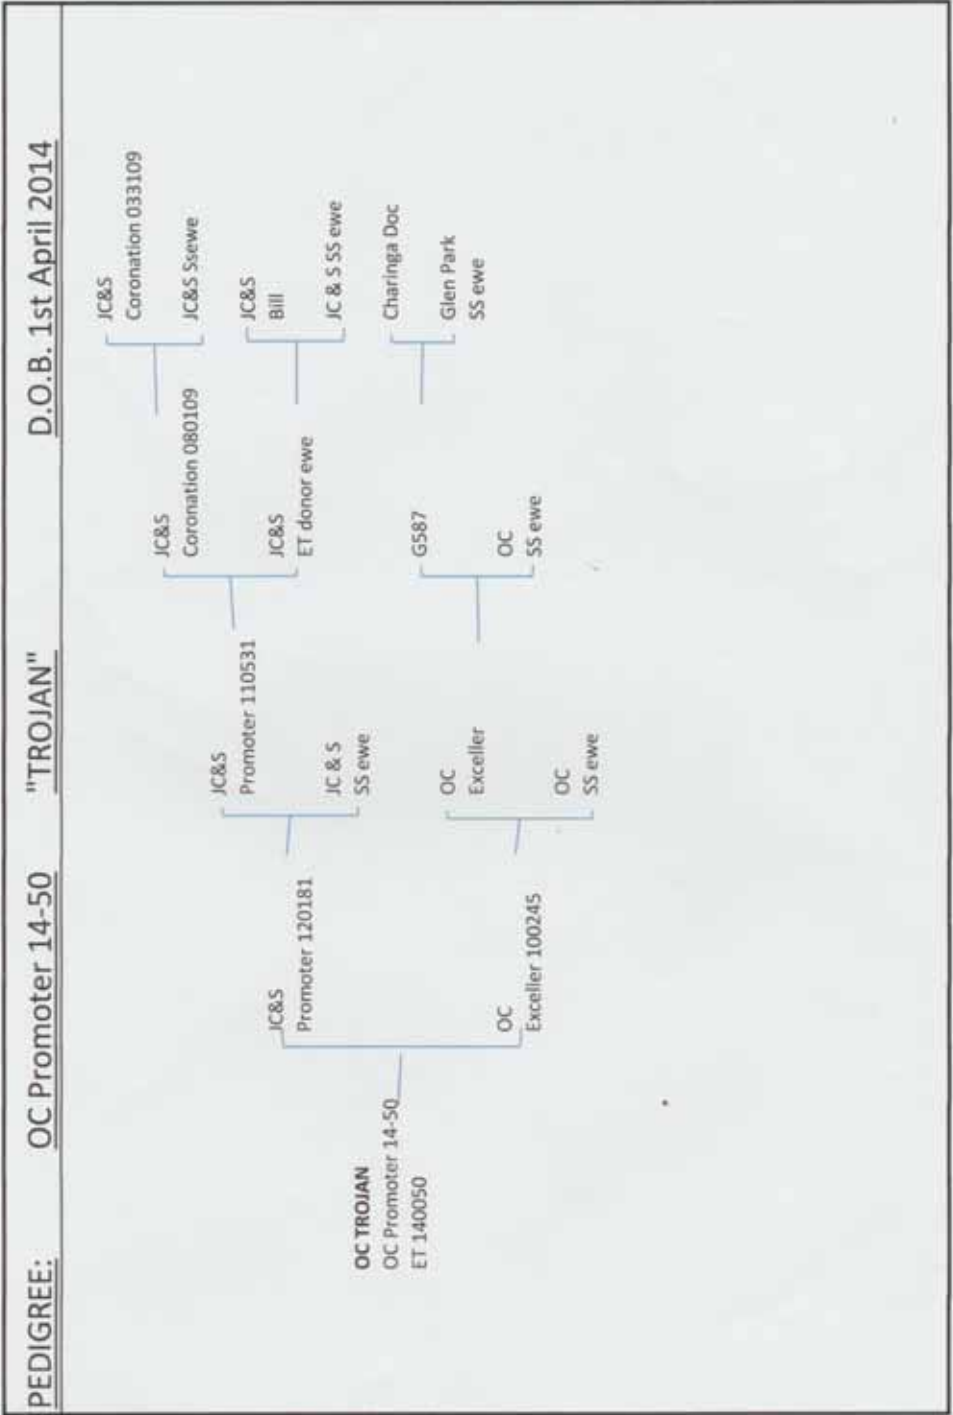

*Tara and 2 sons 151305 & 151303  
(sons at 5 ½ months old)*

#### STUDMASTERS COMMENTS:

This exceptional ET sire could be one of the most powerful and influential rams in the current merino industry.

He carries a beautifully nourished fleece of pure white waxy wool on a massive body for age. As he is a son of OC Trojan you would not expect any less.

But when you see this very special young ram, remember Achilles worked in this fleece all of February and has only been shedded July/August. What a great waterproof wool with such quality and bulk

His sire: OC Trojan  
 dam : TP Tara

This short pedigree says it all.
